Modena, 3 October, 2011

**Dear Mr. Luís Moreno, Secretary of the CEG,**

I carefully examined the Report concerning the 2010 activities of the research centre at the FCT (Science and Technology Foundation, the Portuguese research tutelage institution) and I can express hereafter my opinion.

The research activities in the field of Physical Geography have been carried out with great detail and in depth.

The integration among the various disciplinary sectors and the coordination among the different research units is to be appreciated.

The results appear to be particularly significant and stimulating also for the continuation of the research.

Therefore, my judgement is completely positive.

Best Regards,

Prof. Mario Panizza
